

# 18" DOME LIGHTS CHANGE NOTIFICATION

CURRENT STATE

FUTURE STATE

As part of Grote's commitment to continuous product improvement, changes are being implemented to the: **18" Dome Lights.**

Grote's 18" Dome Lights have been newly redesigned for greater durability and an updated look. By changing the metal back panel to plastic and adding a seal, the lamps are less susceptible to moisture intrusion, removing the need for potting. The new molded plastic back panel now allows for secure mounting through the lens and has no sharp edges, meaning no snags during installation. Still produced at our Grote Electronics facility in Canada, these lamps now also feature improved LEDs as well as a sleeker, more modern appearance.
