REDUCE NOISE POLLUTION WITHOUT COMPROMISING SAFETY

Grote’s “White Noise” backup alarms address concerns associated with traditional tonal alarms in busy work areas. By emitting sound across multiple frequencies, these alarms help to tackle noise pollution.

This design ensures individuals in the danger zone around reversing vehicles are adequately warned, while keeping overall noise levels in check. This makes them an ideal choice for bustling work environments.

FEATURES & BENEFITS

- White Noise alarms help to reduce noise pollution (ideal for use in residential areas)
- Rugged construction which features glass-filled nylon housings
- Universal mounting options for simple installation and replacement
- Rear facing design provides protection for the speaker from the elements ensuring durability
